

WOKINGHAM

Road Casualties Update: Q2 - JANUARY TO JUNE 2024

This Road Casualty Statistics update incorporates provisional STATS19 collision data for the period January to June 2024. It compares collision/casualty figures for Wokingham with trends across Berkshire, including severity data and child casualty figures. Results for selected key road user groups have also been included.

“Please note that this report is based on provisional raw data supplied by the authorities. Aggilysis is not responsible for the accuracy or completeness of information supplied.”

The number of reported KSI casualties appears to have decreased considerably in the first 6 months of 2024, compared to the previous five year average. There have been notable decreases in child casualties, pedal cyclist casualties and involved young drivers compared to the average over previous years.

Each chart in the report is coloured by the type of information it is showing. Collision charts are coloured red, casualty charts are coloured blue and driver charts are green. Each data bar covers the first 6 months of each year, with a five-year grey baseline showing average figures for 2014-2018. The final bar of each chart is lightly shaded to indicate that it includes provisional 2024 data. Data for the whole of Berkshire is shown by the orange line.

INJURY COLLISIONS

Injury collisions across Berkshire have fluctuated over the past decade, but have seen a considerable reduction overall. In the first 6 months of 2024 there were 62 collisions in Wokingham, a reduction from 84 in the same period of 2023. Collisions have reduced by 48% from the baseline period.

ALL CASUALTIES
